STAGE II · ZARA FASHION

The ground floor, reimagined · concept proposal

The guided tour in images: 23 stops and 3 rooms, one page each, then the arrival after the Woven Earth brief in 8 pages.

> Gold label: an AI concept image made from the 3D views. The people in it are fictional and details can differ from the 3D, so each one carries a small render of the same camera in the 3D model. Green label: rendered from the 3D model itself, with simulated light and no people. None of the images is a photograph.

Walk through it in 3D, on a computer or a phone: stage2-office-virtual-tour.imranahmedjh611.workers.dev/stage2-concept/

STOP 1 OF 23

The whole floor

A knitwear factory whose fabric comes from the earth and from what was already made, with Bengal craft as its signature: a concept proposal on the approved Stage II floor. The owner chose the pilot (option C) first: the front rooms, the design wing, the studio and the pilot rooms. Merchandising and the accounts suite are shown as option A, a possible later phase.

RENDERED FROM THE 3D MODEL · BLENDER CYCLES, SIMULATED LIGHT · NO PEOPLE · NOT A PHOTOGRAPH

STOP 2 OF 23

Arrival gallery · the Woven Threshold

Arrive under six handwoven swags of cleaned cutting waste, jute and cotton on a bamboo frame, above the route between the check-in desk and the glass. One terracotta wall, a salvaged-wood bench and one fig tree. Makers, sources and fire tests to be identified.

RENDERED FROM THE 3D MODEL · BLENDER CYCLES, SIMULATED LIGHT · NO PEOPLE · NOT A PHOTOGRAPH

STOP 3 OF 23

Reception and Bengali tea

Tea in clay, the fibre story on the console (cotton, jute, cutting waste, recycled yarn and its knit), handloom on the walls and a small fig tree.

RENDERED FROM THE 3D MODEL · BLENDER CYCLES, SIMULATED LIGHT · NO PEOPLE · NOT A PHOTOGRAPH

The same camera in the 3D model (render, no people)

STOP 4 OF 23

Earth and Sun passage

The Sun wall shows the energy story with grid and backup included (concept, not live data); the earth wall holds the raw side of the fabric story: cotton, jute, recycled fibre and indigo beside clay.

AI CONCEPT IMAGE · MADE FROM THE 3D VIEWS · PEOPLE ARE FICTIONAL · NOT A PHOTOGRAPH

STOP 5 OF 23

Fabric from the earth, and from waste

The approved knitwear stays. Each form and bay shows where its fabric could come from: cotton, a jute and cotton blend (research), cutting waste sorted by colour and spun again, used garments taken back. Illustrative until records arrive.

RENDERED FROM THE 3D MODEL · BLENDER CYCLES, SIMULATED LIGHT · NO PEOPLE · NOT A PHOTOGRAPH

STOP 6 OF 23

Second life in the bays

Jute sacks of offcuts sorted by colour and the yarn spun from them, a take-back crate and a T-shirt mended in kantha stitch, under the approved garments.

RENDERED FROM THE 3D MODEL · BLENDER CYCLES, SIMULATED LIGHT · NO PEOPLE · NOT A PHOTOGRAPH

STOP 7 OF 23

The jhut river

A sewing machine and a river of patchwork pieced from cutting waste, running off the table and across the floor, under natural indigo cloths. An installation: makers to be credited.

RENDERED FROM THE 3D MODEL · BLENDER CYCLES, SIMULATED LIGHT · NO PEOPLE · NOT A PHOTOGRAPH

The same camera in the 3D model (render, no people)

STOP 8 OF 23

Option A · the Green Uthan

A later phase, only if the merchandising team moves: a Bengali courtyard around the column, a bot-tola seat, small trees under grow lights, kula and dala over a bamboo canopy, alpana, hurricane-form lanterns (electric) and natural indigo yarn.

AI CONCEPT IMAGE · MADE FROM THE 3D VIEWS · PEOPLE ARE FICTIONAL · NOT A PHOTOGRAPH

STOP 9 OF 23

Option A · artisan corner

Demonstrations by invitation: a Chakma back-strap loom and Marma weaving and basketry, shown only with the weavers' consent; nakshi kantha, cane, painted shokher hari pots, tepa putul dolls and drums.

RENDERED FROM THE 3D MODEL · BLENDER CYCLES, SIMULATED LIGHT · NO PEOPLE · NOT A PHOTOGRAPH

STOP 10 OF 23

Option A · circular knitwear studio

Wear, remake, repair and return around the Uthan: knitwear on bamboo rails, cutting waste sorted by colour, kantha mending and take-back bins. Illustrative.

RENDERED FROM THE 3D MODEL · BLENDER CYCLES, SIMULATED LIGHT · NO PEOPLE · NOT A PHOTOGRAPH

STOP 11 OF 23

Option A · craft corner

A bamboo trellis with a gamchha, a kantha, a kula and a painting by a rural artist (to be commissioned), a cane bowl chair, a jute pouf and bamboo armchairs. Makers to be identified, paid and credited.

RENDERED FROM THE 3D MODEL · BLENDER CYCLES, SIMULATED LIGHT · NO PEOPLE · NOT A PHOTOGRAPH

STOP 12 OF 23

Option A · design academy

A later phase, only if the accounts team moves: 20 seats inside the existing glass suite, a demonstration bench with a sewing machine and a tutor room. The fire engineer sets the capacity.

RENDERED FROM THE 3D MODEL · BLENDER CYCLES, SIMULATED LIGHT · NO PEOPLE · NOT A PHOTOGRAPH

STOP 13 OF 23

The making line

At the entrance to the design wing: one T-shirt in six steps, from fibre to yarn, knit fabric, cut and sew, test, and wear and return. Illustrative objects; real samples and records replace them.

RENDERED FROM THE 3D MODEL · BLENDER CYCLES, SIMULATED LIGHT · NO PEOPLE · NOT A PHOTOGRAPH

STOP 14 OF 23

The labs behind the glass

A fabric lab with an empty durability log (no results until tests are done), the fibre library with product passport cards next door, and remake and repair in the sample room.

AI CONCEPT IMAGE · MADE FROM THE 3D VIEWS · PEOPLE ARE FICTIONAL · NOT A PHOTOGRAPH

STOP 15 OF 23

CAD · knitwear development

The approved CAD room: one illustrative knit cardigan from flats to pattern, grading and marker. In the concept every style also carries a product passport.

AI CONCEPT IMAGE · MADE FROM THE 3D VIEWS · PEOPLE ARE FICTIONAL · NOT A PHOTOGRAPH

STOP 16 OF 23

Academy annex (pilot)

The pilot academy before any room changes: a class of six learning fibre, knit and repair, and a wall of student work.

RENDERED FROM THE 3D MODEL · BLENDER CYCLES, SIMULATED LIGHT · NO PEOPLE · NOT A PHOTOGRAPH

The same camera in the 3D model (render, no people)

STOP 17 OF 23

The tong · tea in clay

Staff and artisan dining with a Bengali tea stall: a cart front on two wheels, tea in clay cups, an electric lantern in the hurricane form (no kerosene indoors) and wood-slice stools.

AI CONCEPT IMAGE · MADE FROM THE 3D VIEWS · PEOPLE ARE FICTIONAL · NOT A PHOTOGRAPH

STOP 18 OF 23

Collaborative studio

The only room with daylight: the approved sample-review table, and a small fig tree by the window.

RENDERED FROM THE 3D MODEL · BLENDER CYCLES, SIMULATED LIGHT · NO PEOPLE · NOT A PHOTOGRAPH

STOP 19 OF 23

The sunning shelf

Bonsai and tulsi take turns in the daylight of window W10.

RENDERED FROM THE 3D MODEL · BLENDER CYCLES, SIMULATED LIGHT · NO PEOPLE · NOT A PHOTOGRAPH

STOP 20 OF 23

The living wall

At the north end of the studio: organic wooden niches with a warm backlight, snake plant, money plant and peace lily, and a small fig tree either side. No medical claim.

AI CONCEPT IMAGE · MADE FROM THE 3D VIEWS · PEOPLE ARE FICTIONAL · NOT A PHOTOGRAPH

STOP 21 OF 23

The records room

The originals behind every claim, fibre origins and recycled content first. Until documents arrive, every line of the Open Record reads none yet, to prepare or to be collected.

RENDERED FROM THE 3D MODEL · BLENDER CYCLES, SIMULATED LIGHT · NO PEOPLE · NOT A PHOTOGRAPH

The same camera in the 3D model (render, no people)

STOP 22 OF 23

Negotiation suite

The visit ends here: tea in clay at every place, the approved knitwear review trays, a bonsai in the corner.

AI CONCEPT IMAGE · MADE FROM THE 3D VIEWS · PEOPLE ARE FICTIONAL · NOT A PHOTOGRAPH

STOP 23 OF 23

Designed for a Solar-Powered Future

Every claim on this floor waits for its evidence: fibre origins, recycled shares, durability tests, makers, water reports and measured energy. Next: the full export and order centre once HR moves.

STAGE II · Zara Fashion · the arrival camera, before and after the Woven Earth brief

Both rendered from the 3D model with the same camera and the same Cycles light (simulated, no people); not photographs.

Before · the proposal of 1 Nov 2026

Bonsai on granite, three stones, six plaques, terracotta on the desk

After · Woven Earth, 7 Nov 2026

The Woven Threshold beside the check-in desk; one terracotta wall, one bench, one fig tree

WOVEN EARTH · 1 OF 8

The arrival camera, before and after

The same camera and light before the brief (the proposal of 1 Nov 2026: bonsai, stones, plaques, terracotta on the desk) and after it: the Woven Threshold beside the check-in desk, over the route to reception.

RENDERED FROM THE 3D MODEL · BLENDER CYCLES, SIMULATED LIGHT · NO PEOPLE · NOT A PHOTOGRAPH

WOVEN EARTH · 2 OF 8

Back towards the entrance

The swags overhead from the reception door, the fig tree in the daylight of the entrance glass, and the exit sign in view below the threshold. 28 mm, eye height.

RENDERED FROM THE 3D MODEL · BLENDER CYCLES, SIMULATED LIGHT · NO PEOPLE · NOT A PHOTOGRAPH

WOVEN EARTH · 3 OF 8

The threshold and its fixings

Handwoven strips of cleaned cutting waste, jute and cotton on straight bamboo culms through laminated-bamboo rails, black steel rods to deck plates and cotton tapes; one strip mended in kantha stitch. 35 mm.

RENDERED FROM THE 3D MODEL · BLENDER CYCLES, SIMULATED LIGHT · NO PEOPLE · NOT A PHOTOGRAPH

WOVEN EARTH · 4 OF 8

The bench and its bamboo joint

Salvaged hardwood with its end grain, checks and a butterfly key on a laminated-bamboo trestle: a through-tenon split by a hardwood wedge, the slab fixed with dowels, and the bamboo stool with a cane seat. 50 mm.

RENDERED FROM THE 3D MODEL · BLENDER CYCLES, SIMULATED LIGHT · NO PEOPLE · NOT A PHOTOGRAPH

WOVEN EARTH · 5 OF 8

Reception and its brand wall

The approved reception desk and brand wall, tea in clay, the fibre story on the console and a small fig tree.

RENDERED FROM THE 3D MODEL · BLENDER CYCLES, SIMULATED LIGHT · NO PEOPLE · NOT A PHOTOGRAPH

WOVEN EARTH · 6 OF 8

Night check

The arrival camera with no daylight, in the evening scene: the approved linear lights and brand-wall spots, the terracotta wall-washer, and the two narrow spots at full output (by day they run at half). Finding: the front swags glow warm, but the inner layers fall into shadow; a low-angle wash for them is still to be designed by a lighting designer.

RENDERED FROM THE 3D MODEL · BLENDER CYCLES, SIMULATED LIGHT · NO PEOPLE · NOT A PHOTOGRAPH

WOVEN EARTH · 7 OF 8

Terracotta wall and bench

One hand-pressed terracotta surface whose raised diamonds follow the Jamdani repeat, drawn by the wall-washer, with the salvaged bench and the bamboo stool off the route.

RENDERED FROM THE 3D MODEL · BLENDER CYCLES, SIMULATED LIGHT · NO PEOPLE · NOT A PHOTOGRAPH

STAGE II · ZARA FASHION · WOVEN EARTH

The arrival in materials: sources, makers and upkeep

What each element of the arrival gallery and reception is made of, where it would come from and how it is kept. Every source, maker and test is still to be identified: nothing here is claimed.

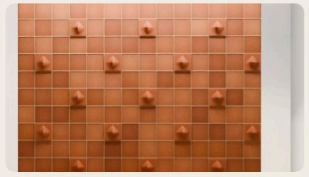

The Woven Threshold

MATERIALS
Six handwoven swags: cleaned cutting waste (jhut) in strips, with natural jute and cotton. Ecru and sand, accents of olive, indigo and a little clay; one strip mended in kantha stitch. A frame of laminated bamboo rails and straight bamboo culms on black steel rods from the deck.

SOURCE AND MAKERS
Jhut: traceable, cleaned and sorted by fibre and colour, with a material passport, source to be identified. Weavers: to be identified, paid and credited. Bamboo and steel: suppliers to be identified.

UPKEEP AND CHECKS
Each swag lifts off its culm for cleaning. Fire suitability of the textile, anchors in the deck, sprinkler and detector coverage, egress and maintenance access: to be confirmed by the fire and structural engineers.

Terracotta wall

MATERIALS
One hand-pressed terracotta surface on the free west wall: 150 mm square tiles in lime joints; raised diamonds follow the repeat logic of Jamdani. A linear wall-washer (3000 K) on the deck draws them in light and shadow.

SOURCE AND MAKERS
Local fabricator: to be identified.

UPKEEP AND CHECKS
Dusting. Tile weight, fixing and anchorage: to be checked.

Salvaged bench and bamboo stool

MATERIALS
A salvaged hardwood slab, its end grain, checks and old fixing holes kept, a butterfly key across one check; two laminated-bamboo trestles with through-tenons, hardwood wedges and dowels. A light bamboo stool with a cane seat.

SOURCE AND MAKERS
Timber: legally salvaged, seasoned and documented, never fresh-felled; source and moisture content to be documented. Bamboo: verified supplier to be identified.

UPKEEP AND CHECKS
Low-VOC oil finish, repairable fasteners. Bamboo durability, pest treatment and load test: to be done.

One fig tree

MATERIALS
One fig tree in a terracotta planter by the glass entrance, on the approved potted tree's footprint.

SOURCE AND MAKERS
Grower: to be identified.

UPKEEP AND CHECKS
Daylight from the existing entrance glass only; watering and turning to a care schedule.

From fibre to second life

MATERIALS
On the reception console, one oak tray: raw cotton, jute fibre, cutting waste sorted by colour, recycled yarn and the knit it becomes.

SOURCE AND MAKERS
Illustrative samples. Fibre sources and recycled shares: to be documented.

UPKEEP AND CHECKS
Samples replaced by documented ones as records arrive.

Light: daylight only through the existing entrance glass; the approved linear lights (3500 K) and brand-wall spots (3000 K) stay; two narrow spots (3000 K) on the threshold and one linear wall-washer (3000 K) on the terracotta are the only additions, dimmable: half output by day, full in the evening.

Concept proposal on the approved Stage II floor. The geometry is locked: column grid, beams, ceiling height, glazing, doors, check-in desk, brand wall and circulation are unchanged. Final design requires architect / engineer review, local fire and building compliance, and actual contractor quotations. Images rendered from the 3D model (Blender Cycles, simulated light, no people).

CONCEPT PROPOSAL

Walk through it in 3D

stage2-office-virtual-tour.imranahmedjh611.workers.dev/stage2-concept/

Concept proposal on the approved Stage II floor · fibre origins, recycled shares, tests, makers, artists, growers, stone sources and energy data are still to be identified · no people in the 3D; the concept images show fictional people.
